

Hi. I'm Sam Borick.

Akron, OH | [linkedin.com/in/borick](https://www.linkedin.com/in/borick) | [Borick.net](http://borick.net)

SUMMARY

I am a full-stack developer. My long history of startups and entrepreneurship helps me build great software, back-to-front. I'm looking for full-time or contract work here in Akron OH or Remote.

SKILLS (Full list on request)

Ionic, Angular2+, AngularJS, Golang, Xamarin, C#, .NET, PostgreSQL, MVC, Blockchain, API Design, Git, AWS, Terraform, Continuous Delivery, Android, iOS.

PROFESSIONAL EXPERIENCE

Software Developer, [Onosys](#), Remote. Dec 2019 – Present

- **Automated Mobile App Delivery**. Converted build process from a four-hour manual build to a five minute automated process. Saved developer time and resources.
- **Improved User Experience**. Added features to the platform to remove bugs and add features.

Freelance Software Developer, [Pepware LLC](#), Remote. Aug 2017 – Present

- **Built the Excalibur Auto Body mobile app**. Saved administrator time with photo estimates of vehicle damages. Used Ionic & Golang, deployed on [iOS](#) and [Android](#).
- **Built the Oriana House mobile app**. Provided valuable offline access to critical information for program members. Used Ionic, deployed on [iOS](#) and [Android](#).
- **Designed AutoApp**, a SaaS for building mobile applications for the automotive repair industry. Performed market research and customer interviews. Used Ionic & Golang.

Contract Xamarin Developer, [Virginia Transportation Corporation](#), Remote. Aug 2018 – Feb 2019

- **Built the VTC mobile app**. Increased driver efficiency by providing process controls and real-time data feedback to operators. Used Xamarin Forms and ASP.NET.
- **Created development roadmap** based on existing codebase to deliver an MVP rapidly & on time.

Lead Developer, [HungerPerks](#), Remote. Jan 2017 – Aug 2018

- **Built the HungerPerks mobile app**. Saved customer's money by providing coupons to local restaurants. Used Ionic & Golang, deployed on iOS and Android.
- **Built the HungerPerks Web app**. Provided restaurants valuable data by asking customers simple survey questions. Used Angular2+ & Golang, deployed on AWS.
- **Increased customer retention** with improvements to the custom geo-location notification service and simplified coupon redemption flow.
- **Improved login User Experience** by conducting customer interviews and rapidly iterating.

EDUCATION

The University Of Akron, Ohio. Honors in Computer Science.
